We sell 3 formulas of vapor liquid substrates “**Clouds**” which is primarily vegetable glycerin and offers the most appearance of smoke, (this does contain some PG) “**Hitters**” which is primarily Propylene Glycol based and designed for those who prefer “throat hit,” (this does contain some VG) and “**Both World’s**” which is fifty/fifty Vegetable Glycerin and Propylene Glycol. We find women seem to prefer “Clouds” and men seem to prefer “Hitters” – although everyone seems to like “Both World’s.”

Beyond actual substrate we sell various levels of flavor...
